PRESS RELEASE

TRIANGLE LAUNCHES DENIM COLLECTION

ROTTENDORF, 17 May 2016

In September 2016, TRIANGLE is launching a denim collection with styles for different figure types, which guarantees perfect fits and a high level of wear comfort. The basic shapes "regular" and "curvy fit" are used to translate current trends into modern cuts. Regular fit trousers have the ideal fit for ladies with a flat behind and a straight silhouette: the shape defines and elongates. The curvy fit is perfect for curvy ladies: it flatters their curves and provides a pleasant wear feeling. Both fits are available in various leg shapes like extra slim leg, slim leg, straight leg and flared leg. The trousers are seen in modern interpretations as *cropped denims*, in trendy *fancy boyfriend fits* and *wide leg* styles in grey, blue and black. Decorative tapes, rivets, destroyed elements and various washes turn the TRIANGLE denims into something special. Denim dungarees and denim jumpsuits featuring a combination of two washes are the fashionable highlights.

In addition to regular and curvy fit trousers, TRIANGLE features figure-shaping denims. Thanks to their slim fit, the trousers are tight against the body and visually elongate. The cotton/elastane mix is firm, dimensionally stable and, thanks to its high level of elasticity, easily retains its shape. A silicone tape at the back pockets makes for a beautiful, figure-shaping push-up effect. The trousers will be available from September 2016.
